EDUCATION

The Chinese University of Hong Kong Aug 2025 – Jul 2026
MSc in E-Commerce and Logistics Technologies
GPA: 3.55/4.0; MSc Outstanding Graduate Award 2026 (top15%)

China University of Petroleum (East China) Sep 2021 – Jun 2025
Bachelor of Management in Engineering Management
GPA: 86.73/100; 3.67/5.0

RESEARCH EXPERIENCE

The University of Hong Kong | Hong Kong SAR | Full-time
Research Assistant to Prof. Andy S. Back Jul 2026 – Present

- Build an original database linking PitchBook financing transactions and investor records to public funding announcements, documenting how startups and investors disclose their investment relationships
- Design and compare single- and multi-agent workflows for source discovery, financing-event matching, investor-mention coding, review, and independent verification
- Evaluate coding agreement, confidence, and research time against human-coded reference labels; refine research instructions through case-level error analysis
- Designed and prototyped programmatic agent coordination and workflows combining scripted automation with AI agents for research data collection
- Process NIH grant data and develop Python workflows combining web search, Selenium, and LLM-assisted evidence assessment to track researchers' institutional moves following funding terminations

The University of Hong Kong | Hong Kong SAR | Part-time
Research Assistant to Prof. Andy S. Back Sep 2025 – Jul 2026

- Structured M&A call transcripts by speaker role and firm affiliation; matched call content with transaction, stock-return, and analyst data for empirical analyses in Python and Stata
- Designed prompts and conducted LLM-based text scoring alongside dictionary-based measures to construct and validate narrative coherence and executive-participation variables
- Examined substantive explanations and symbolic endorsements through linguistic alignment, speaking roles, and Q&A participation; contributed to hypothesis development, research memos, and manuscript drafts
- Supported database construction and analysis for strategic-alliance and venture-financing research involving firms, investors, executives, and boards

The Chinese University of Hong Kong | Hong Kong SAR | Part-time
Student Researcher with Prof. Jing Wu's research group Sep 2025 – Nov 2025

- Built and analyzed a U.S.–Mexico trade dataset; visualized import and export patterns, explored associations with trade policy, and drafted a research proposal
- Assessed the trade data's research value and helped formulate trade-policy research questions

Central University of Finance and Economics | Beijing, China | Part-time
Research Assistant to Prof. Jianmei Zhao Apr 2025 – Oct 2025

- Collected and organized data for an e-commerce research project and conducted panel-data regression analyses using R and Python
- Contributed to database construction and preparation of analysis-ready panel datasets

China University of Petroleum (East China) | Qingdao, China | Part-time
Research Assistant to Prof. Jiekun Song Feb 2024 – Jun 2025

- Estimated marine-fishery carbon emission efficiency using a super-efficiency SBM model and constructed interprovincial spatial networks using a modified gravity model
- Proposed and implemented temporal exponential random graph model (TERGM) analyses in R to examine network structure, provincial attributes, and geographic proximity; coauthored an article in Ocean & Coastal Management
- Used Vensim for system-dynamics simulations and evolutionary-game modeling

PUBLICATIONS

Song, J., **Guo, X.**, Ding, Y., & Xiao, H. (2026). Characteristics and influencing factors of the carbon emission efficiency association network of China's marine fishery industry. *Ocean & Coastal Management, 276*, 108143. https://doi.org/10.1016/j.ocecoaman.2026.108143

WORK IN PREPARATION

Back, A., An, K., & **Guo, X.** Visible participation, unequal voice: Target executive involvement in M&A conference calls.

Manuscript in preparation

Strategic Disclosure of Investor Relationships in Entrepreneurial Financing
Developing an original database linking financing transactions to public announcements to examine how startups selectively disclose investor relationships, alongside the design and evaluation of multi-agent AI workflows for research data collection and validation

ACADEMIC TRAINING

INSEAD | Online Pre-Doctoral Summer Camp May 2026 – Jun 2026
Using AI for Research in Organization Science
Systematically study the application of AI in organizational scientific research, including theoretical frameworks, research design, text analysis, and LLM-assisted research methods. Develop a final research proposal

INTERNSHIP EXPERIENCE

Beijing Yunong High Quality Agricultural Products Planting Co., Ltd.
Supply Chain and Logistics Intern Jul 2024 – Sep 2024

- Tracked product inflows and outflows in internal software, coordinated with suppliers, and arranged warehouse, cold-storage, and greenhouse use; calculated product loss rates and conducted economic analyses to support cold-chain and logistics operations

China Construction First Group Co., Ltd.
Project Management Intern Jun 2023 – Aug 2023

- Supported project workflow management, drafted project documents, coordinated meetings; prepared quantity takeoffs and unit-price analyses for project cost estimates and economic evaluation; supported monitoring of project progress and quality requirements

SKILLS

Research Methods: Difference-in-differences (DiD), panel-data regression, and event studies; social network analysis (ERGM/TERGM); system dynamics and robust optimization; AI-assisted research using LLM-based text coding and multi-agent workflows

Data Skills: Data cleaning, research database construction, record linkage, web scraping, and text analysis

Technical Skills: Python, R, Stata, MATLAB, ArcGIS, Gephi, UCINET, Vensim; JavaScript, HTML, CSS

Special Skills: Fencing (women's team foil), tennis, cycling, drumming in a band

Languages: English (fluent); Chinese

HONORS AND AWARDS

MSc Graduate Award, 2026 (CUHK)
Outstanding Undergraduate Thesis Award (UPC) Jun 2025
Outstanding Student Award (UPC) Sep 2024
Academic Excellence Scholarship (UPC) Jun 2024
Academic Progress Scholarship (UPC) Sep 2023
